COMMUNICATION

Communication is one of the largest majors on campus. The Hope College Department of Communication has been recognized by the National Communication Association for its outstanding curriculum and was twice named a "Program of Excellence" by the Central States Communication Association for its curricular program.

ABOUT THE PROGRAM

The curriculum integrates theory and practice emphasizing various types of communication: corporate communication, global communication and peace studies, journalism and writing for media, media production and criticism, organizational communication and leadership, relational communication, and rhetoric and public advocacy. Through research, experiential learning and civic engagement, our courses will give you a deep understanding of how communication plays an integral role in social life. The Department of Communication is housed in the state-of-the-art Martha Miller Center for Global Communication, where students can use video production, journalism, speech and research facilities.

Communication knowledge and skills are essential for personal success and for participation in a complex, globalizing society. Communication competence incorporates a number of learning goals often identified as important by employers and graduate schools. These goals include:

• Interacting easily and productively with others;
• Thinking critically and solving problems;
• Communicating ideas clearly and effectively;
• Creating messages for various media and audiences;
• Balancing conflicting viewpoints;
• Interpreting quantitative and qualitative data;
• Working for social justice and change.

SOCIAL SCIENCE REQUIREMENT

Communication 101 (The Communication Process) satisfies the Social Science I and Global Learning-Domestic general education requirements. This course focuses on communication competence – the ability to communicate effectively in relationships and to critically analyze media messages.

Communication 151 (Media & Society) satisfies the Social Science II and Global Learning-International general education requirements. This course is an introduction to the different types of media and the impact of media on society. Emphasis varies with instructor.
MAJORS

Communication majors at Hope often link their academic programs with other disciplines as they prepare for careers in public, private and non-profit organizations, media, business, theatre, and teaching. Professional plans in journalism, broadcasting, public relations, human resource development, film, corporate communication, public speaking, ministry, advertising, global communication, and government often stem from opportunities provided to communication majors. The nationally-recognized Hope communication curriculum also provides a strong and well-regarded foundation for students planning further study in communication at major graduate institutions.

Communication

The communication major curriculum is designed to provide a balanced education emphasizing theoretical understanding and skill development across all significant communication contexts. A student typically enters the program through any one of three introductory courses (101, 140, 151). In addition, participants learn how to communicate their own feelings, experiences and beliefs, without imposing their experience on others. They learn to support each other, yet confront and challenge each others’ views. In the process of learning the communication skills of dialogue, participants also learn about the historical and structural inequalities, oppression, privilege and power associated with different social identities. The goal of intergroup dialogue is to increase intergroup understanding, effective collaboration and positive relationships.
