Are you a creative type (right brained) or an analytical type (left brained)? Do you ever wish you were a little more of the other? Come learn how to toggle back and forth between your right and left brain, making best use of both. This workshop takes a deeper look at how we process information visually. Then you'll learn some simple exercises that will help you to make information connections in your brain that you may never have known you could make. You'll leave seeing the world at least a little...and maybe a lot...differently.
