Research Opportunities for High School Students

Location: Schaap 1019

This will be a "show and tell" then Q and A about the REACH research program. It would include HS student participants, teacher participants and Hope Faculty Mentors. This would follow the NCUR keynote with Dr. Nancy Hensel, the Executive Officer of CUR. We would invite area HS science teachers, the '11 REACH scholars and their families, as well as the Holland Community. High school sophomores and teachers who are interested in the 2012 REACH program are especially invited to attend.
